

Getting started

Distavo watches a folder and turns each new recording into a Markdown note. Transcription runs right on this Mac (or on your own WhisperX server); summaries use your own Ollama. Nothing is ever sent to a cloud service.

Watches `/Users/marc/Documents/Distavo/recordings`

Writes notes to `/Users/marc/Documents/Distavo/notes`

Working files `/Users/marc/Library/Application Support/Distavo/work`

These folders are created automatically if they don't exist. Tip: set the watch folder to an iCloud Drive / Google Drive folder so recordings made elsewhere are processed once they finish syncing.

General

Watch interval 10s 

Watch folder `~/Documents/Distavo/recordings` 

Notes folder `~/Documents/Distavo/notes`

Work folder `~/Library/Application Support/Distavo/work`

Note owner Me

Your speaker label Marc
